NUMBER OF EMPLOYEES

STATEMENT BY FIRM M-Co Engineering has provided Energy Modeling, HVAC, plumbing, sprinkler, mechanical and commissioning engineering consulting services since 1995. Russell A. Martin, PE has been performing mechanical engineering in Northern New England since 1973. Jacob Martin, PE has joined the M-Co team to assist in providing clients a wide variety of professional consulting services. M-Co has the ability to utilize additional consultants and technical support staff as appropriate for selected projects. Projects and clients have included educational, governmental, municipal, institutional, industrial, commercial, architectural, multi-family housing, healthcare and residential. Clients also include general and mechanical contractors and local representation and sub-contracting design assistance for architectural / engineering firms. Recent projects have included school renovations with extensive heating, ventilating and energy conservation modifications. The firm has specialized expertise in energy solutions and high-tech HVAC design, including laboratories, chilled water systems and energy recovery. Designs are formulated and optimized utilizing extensive expertise and high technology software including Energy Modeling, Building Information Modeling (BIM), and Engineering Economic & Lifecycle Costing & Cost Estimating. Russell Martin has seen several energy cost cycles, and is committed to assist clients with a long term perspective to reduce energy costs and move sustainable solutions.
